About Frontiers

Frontiers is more than just an open-access publisher of scholarly articles: it is a pioneering approach to the world of academia, radically improving the way scholarly research is managed. The grand vision of Frontiers is a world where all people have an equal opportunity to seek, share and generate knowledge. Frontiers provides immediate and permanent online open access to all its publications, but this alone is not enough to realize our grand goals.

Frontiers Journal Series

The Frontiers Journal Series is a multi-tier and interdisciplinary set of open-access, online journals, promising a paradigm shift from the current review, selection and dissemination processes in academic publishing. All Frontiers journals are driven by researchers for researchers; therefore, they constitute a service to the scholarly community. At the same time, the Frontiers Journal Series operates on a revolutionary invention, the tiered publishing system, initially addressing specific communities of scholars, and gradually climbing up to broader public understanding, thus serving the interests of the lay society, too.

Dedication to Quality

Each Frontiers article is a landmark of the highest quality, thanks to genuinely collaborative interactions between authors and review editors, who include some of the world's best academicians. Research must be certified by peers before entering a stream of knowledge that may eventually reach the public - and shape society; therefore, Frontiers only applies the most rigorous and unbiased reviews.

Frontiers revolutionizes research publishing by freely delivering the most outstanding research, evaluated with no bias from both the academic and social point of view. By applying the most advanced information technologies, Frontiers is catapulting scholarly publishing into a new generation.

What are Frontiers Research Topics?

Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: researchtopics@frontiersin.org

SAFETY, RISK AND UNCERTAINTIES IN TRANSPORTATION AND TRANSIT SYSTEMS

Topic Editors:

Akira Matsumoto, Nihon University, Japan

Min An, University of Salford , United Kingdom

Sakdirat Kaewunruen, University of Birmingham, United Kingdom

Citation: Matsumoto, A., An, M., Kaewunruen, S., eds. (2019). Safety, Risk and Uncertainties in Transportation and Transit Systems. Lausanne: Frontiers Media.
doi: 10.3389/978-2-88945-951-3

Table of Contents

- 04 Editorial: Safety, Risk and Uncertainties in Transportation and Transit Systems**
Akira Matsumoto, Min An, Coen Van Gulijk and Sakdirat Kaewunruen
- 06 Resilience and Robustness of Composite Steel and Precast Concrete Track Slabs Exposed to Train Derailments**
Olivia Mirza and Sakdirat Kaewunruen
- 19 Far-Field Earthquake Responses of Overhead Line Equipment (OHLE) Structure Considering Soil-Structure Interaction**
Chayut Ngamkhanong, Sakdirat Kaewunruen and Charalampos Baniotopoulos
- 29 Role of Pre-processing in Textual Data Fusion: Learn From the Croydon Tram Tragedy**
Mohd H. Bin Osman and Sakdirat Kaewunruen
- 35 Commentary: Fatigue Life Assessment Method for Prestressed Concrete Sleepers**
Keiichi Goto, Tsutomu Watanabe, Mitsuru Hosoda and Shintaro Minoura
